

SWE San Diego welcomes you to a speaker evening hosted at Solar Turbines!

A Convenient Truth: Strategies for Mitigating Greenhouse Gas Emissions and Global Warming

Conventional Power Plant

Combined Heat & Power Plant

This presentation will discuss the causes of climate change, existing technologies to mitigate them, and landfill gas applications in the Los Angeles Basin that will utilize industrial gas turbines.

Dave Schnaars

Environmental Strategies Manager

Mark Hughes

Power Generation Market Development Manager

Thursday
June 25, 2009
